WORK EXPERIENCE

UI/UX Developer

GAC – Dubai, UAE 2015 – 2021

- Managed a small team of UX designers to organize their day-to-day tasks of doing research and design. Each of the members has a good output on every sprint release.

- Designed one of the biggest applications in GAC with the help of product owners and stakeholders. The design was submitted and launched to the public with returning clients as a bonus.

- Worked with a graphic designer to implement the design specification that will be forwarded to the developers. It boosts their productivity and the outcome of the applications.

- Converted one of the legacy apps into the latest technology (Silverlight to HTML5)
  - Conducted UX research with the proprietor users to create personas, journey mapping, and empathy mapping.
  - Worked with the user by sketching the pages on paper to determine the actual application functionality.
  - Prototyped the initial high fidelity design to have a better outcome and also to define what the sprint epic on a user wants vs needs mapping.

Adamson University

Manila – Philippines

June 2008 – March 2013

CERTIFICATION

Scrum Foundation
Scrum Alliance – 2022

WORK EXPERIENCE

System Analyst

Mobiiworld – Dubai, UAE 2014 – 2015

- Maintains a good quality application by doing functional testing and exploratory testing. Fewer bugs and issues are reported by the client on every sprint.
- Developed automated testing for the mobile applications for every released version. It maintains the application's stable version and easy for the tester to do regression.
- Handled user acceptance testing for every client that determines the ratio of each application's success.
- Maintains a wide range of test documents for every application that's been used as standards for company quality releases.
